

# EXCEL®

**New design!!!**

**UGDV**

**GDV**

Van Beest has developed a new type of shortening clutch. With this type of clutch, you do not need an extra leg of chain for your shortening clutch, so less components are required at the master link. You simply attach the clutch at any point along a sling leg to shorten the sling length. You can move it up and down the chain to adjust the length exactly where and how you prefer.

This clutch is available from stock for diameters 8 and 13 mm grade 8 and grade 10 chain. Other sizes will be manufactured shortly.

Please find herewith the latest Van Beest product information including details of the clutch. For more information please contact us: [sales@vanbeest.com](mailto:sales@vanbeest.com)

### EXCEL® Shortening clutch with double locking, grade 10

- Material** : alloy steel, grade 10, quenched and tempered
- Safety factor** : MBL equals 4 x WLL
