

G-6416

Van Beest has recently taken stock of the most popular size of the Green Pin® Short bow socket. This socket is suitable for wire rope 3" - 3 1/8".

Sockets are used to attach steel wire rope to a fixed point. They are the strongest steel wire rope end fittings available, and if they are assembled in the proper way they meet at least the breaking strength of the steel wire rope. With short bow sockets you save money in replacement costs by eliminating costly downtime.

Please find herewith the latest Van Beest product information including details of these sockets. For more information please contact us: [sales@vanbeest.com](mailto:sales@vanbeest.com)

## Green Pin® Short bow sockets closed spelter socket

**Now available  
from stock!!**
